---

Dear Human Resource Manager

I'm Teng-Yuan Liu, call me Shuk Liu, currently based in Dublin , Ireland. I concentrated in software engineer , including in many fields web app , game development , analysis , infrastructures , and comfortable with cutting-edge technologies.

My background includes web development , cloud application solution , and game development.

- In web deployment , working knowledge of web application , including front-end and back-end , and how to optimize. Familiar with MVC frameworks , such as AngularJS, ReactJS, Play and Django. Even not solid of each, but solid how they work.
- In the game company , it's totally required highly available(HA) and quick response to keep services always online. Because service down 1 mins will lose thousands of money. I also do analysis and A/B testing in this role.
- In cloud solution experience I dealt with quantitative services flow design, how to deploy and scale with each app , avoid HotSpot issue , and keep service robust.

As a foreigner. Rent and Share the property that is i really concerned about. And U.K. just voted to Out of EU , this really make Ireland valuable right now. Specially Ireland government may invest €200 millions to housing development. That's quite a big deal. That's why i want to join you.

I learn new as needed, study what i don't know as interested. I definitely can make positive contribution in this position. If you are interested , please take a look of my CV and I look forward a discuss for how i can contribute the company. Thanks for your time.

Sincerely

Liu, Teng-Yuan ( Shuk )
