Dear Human Resource Manager

My name is Shuk Liu, come from Taiwan. I currently are working as a Full-stack or DevOps. Most of time, I study some concepts and how mechanisms work, may not real implementation. For example, the TOTP password. However, if the similars are required in my daily, I'm more than happy to study in details and implement it. For now, I'm looking for highly technical, english-based company for my next 3 - 5 years, espeacially in high laitude location. If you see probably a good fit or portential fits, please kindly check my CV. I'm looking foward to discuss more in details.

Sincerely

Liu, Teng-Yuan (Shuk)
