Infra/Tooling: AWS, K8S(Istio), EFK, Docker Linux, Gitlab, Azure DevOps, RDB, ElasticSearch, Mongo, Redis

Concept: Micro-service, Event-driven, HA, Scalability, SOLID, Design Pattern, CI/CD, Cache, TDD, RWD, SDLC

Methodology: Scrum, Agile, Lean

Work Experience

AI Engineer | self-directed | *

2026/06 ~

- Use varieties AI models (Gemini/Claude/GPT/Grok/MiniMax/DeepSeek/Owen/ElevenLabs)
- Build Agent SDK to accommodate different providers and models.
- Orchestrate personal infrastructure (account/payment/cloud).
- Built few iOS tool apps, 1 product service, surfing tracking, 2 voice agent prototypes(tutor, customer service)

Senior Software Engineer (Tech Lead) | ByteDance(TikTok PTE. LTD.) | Singapore

2023/01 ~ 2026/08

One of top social media company

- Aligned internal and external services onto a new data centre, coordinating across teams
- Owned the wallet data architecture roadmap and its data SDLC.
 - Delivered a deadline-driven EU data migration for wallet.
 - Upgraded that migration into a high-abstraction process serving multiple purposes
 - Defined the data SDLC, keep data align compliance and consistency.
 - Redesigned the cross-data-centre channels, consolidating the one-off ones into a single transport.
 - Designed transaction data redundancy across data centre, lowering overall efforts by 2 job grades.

Senior Engineer | TSMC | Hsinchu, TW

2022/03 ~ 2022/07

Biggest Semiconductor company.

- Work on K8S(Docker, Istio, EFK, prometheus, Grafana, Argo, Nats), Node, Redis, Azure DevOps
- I worked as a technical project manager to break down tasks and target schedules with goals
- I did architect AI platform to make the scope clear to drive directions and align with business need
- Construct and build the high standard on projects, like less 30 lines function, 90+% testing coverage.
- Projects: GPU job scheduler, PoC tools, CI/CD flow on Azure in TSMC
- Left due to company culture fit. with appreciation from managers and department manager

Tech Lead + Senior Engineer | ChangeHealthCare | Songshan, TW

2017/02 ~ 2021/09

US health care company (remote).

- Work on Scrum, AWS, Golang, Java (Spring Boot, MVC, Batch, Data), ElasticSearch, React.
- 5 ppl management, coordination across teams, interviews assessment 30+ rounds
- Created frameworks for Lambda, Event Annotation, Spring Secret Manager plugin, EventBus.
- Designed and resolved security issues (Email unsubscribe with JWT, KMS with jenkins CI, fortify)
- Projects: Async file event batch process (S3), User engagement service (Pinpoint, CloudFront), Log alerting (CloudWatch, SNS), Enterprise solutions migration (AWS, Apigee)

Cloud Engineer | Shanghai Droi Tech Co. Ltd. | Taipei 101, TW

2015/07 - 2016/05

Internet company, 500+ people, from device hardware to backend as a cloud application solution(e.g. [parse.com](#))

- Worked on Bash, Lua, Linux, Nginx, Docker, Jenkins, Ansible, Kubernetes, Mongo, PostgreSQL.
- Model CI/CD of "Backend As A Service" by integrating Jenkins, Docker, Kubernetes
- End to end test framework on the platform, including syntax check, api detected, and request profiling.
- Cli tool to make linear version control, let user manage their own code simply.

Game and BI developer | Gamesoft Inc. | Taipei, TW

2012/11 - 2015/04

Online Game company, 200 people, self-made games including Mahjong, Poker, FPS, and RPG

- Worked on LAMP, Perl, HTML5, Javascript, AngularJS, CSS, Memcache, A/B testing, Data Pipeline.
- Develop features around games and work as data engineer
- Projects: Win8 App "[Godgame big two](#)", "[Godgame Texas Hold'em](#)", [Omaha](#) optimize time complexity

Friend service, Survey service, User group analysis tool, Refactor customer service

Web developer | National Central University | Zhongli, Taiwan

2010/03- 2011/06

- Setup LAMP websites, bypass library system for ebook search , saving \$20000 at least and maintaining fee

Other Experience

Working Holiday | | Europe

06/2016 ~ 02/2017

Go Ireland with Working Holiday VISA. This VISA can participate any roles in Ireland. But even I resolved this ambiguous policy with WHA Immigration Office. It didn't get recognized for permanent SE role. After stayed for 80 days and took 30 days for Euro tour, I backed to my Taiwan. I started to recalled some role's criteria which I saw in this trip and studied more algorithms.

- Participated language exchange community
- Lee Code with Python, C++, javascript (2016/05- present)
- Google C++ education (2016/06 - 2016/06)

Break and Self-Study | | Taiwan

2015/04 - 2015/06

- Free code camp with HTML5 (2015/09 - 2015/11)
- Personal web site <http://shuk.info/> with ReactJS, RWD (2015/04 - 2015/06) (Domain is not available anymore)

Alternative civilian service | *Dept. of Civil Servant Development* | Taipei, TW

2011/12 - 2012/11

- [PHP] Assist staffs to discuss system spec of Taipei e-campus , discuss priorities with third party engineers.

Housekeeper | Motel 6 W&H (working holiday) | Moab, US

2011/06- 2011/11

- US Working Holiday project(J1 visa). Co-work with American , Mexican , Indian , Russian , China , and Turks.
